Current Effective Date:

~~06/07/2025~~ ~~TBD~~ ~~10-1-25~~ 10/01/2025

POLICY

This policy informs prescribers of preferred products and provides an exception process for non-preferred products. All products require prior authorization.

I. PLAN DESIGN SUMMARY

This program applies to the disease-modifying antirheumatic drug (DMARD) products specified in this policy. Coverage for non-preferred products is provided based on clinical circumstances that would exclude the use of the preferred product and may be based on previous use of a product. The coverage review process will ascertain situations where a clinical exception can be made. For Humira, ~~and non-preferred Humira biosimilars~~, Remicade, non-preferred Remicade biosimilars, Stelara ~~and non-preferred Stelara biosimilars~~ this program applies to adult members who are 18 years and older requesting treatment with a non-preferred product. For all other drugs, this program applies to adult members who are 18 years and older and are new to treatment with a non-preferred product for the first time.

II. EXCEPTION CRITERIA

This program applies to members requesting treatment for an indication that is FDA-approved for the preferred and non-preferred products. Drug-specific PA criteria will apply for all preferred and non-preferred products. New-to-market products will be considered non-preferred until they are added to this policy.
